## OUR PROCESS

A **streamlined** and **stress-free** build process where trust, transparency and communication are paramount.

### 01

Project Initiation

**Initial enquiry.** A questionnaire and phone call to ensure we understand the project — including current plans, certifications and other collaborators.

**Design consultation.** A discussion about the scope of works, vision and budget. MM Corp can lead the design phase or work with other professionals. Timelines and concept plans will be established.

### 02

Design & Planning

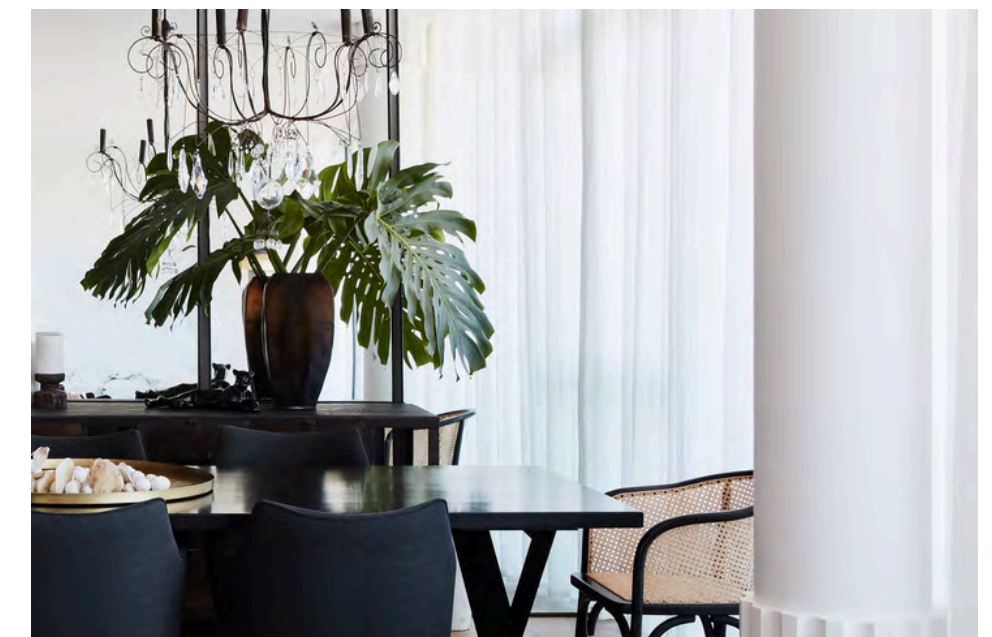

**Design and planning reviews.** An in-depth quote inclusive of site surveys, soil tests, engineer consults, architectural working drawings, energy efficiency reports and council approvals as needed.

**Tender proposal.** A comprehensive cost breakdown for your project, including all selections, trades and an estimated construction timeframe and schedule.

### 03

Construction & Completion

**Under construction.** Your designs become a physical reality. Monitor the project in real time using our client portal.

**Handover.** A comprehensive document of product warranties and manuals for maintenance, servicing and cleaning — plus a quality assurance check 3 months post-construction. Rest assured we will see the project through.
